Flag: Follow up

Tu,

I forwarded the information to my Division manager, Jesse Franco, and Dept Director, William Wong, and they can forward to the appropriate people that would respond if necessary. This is not an effort my group is involved with and although we are interested in the Study as part our overall groundwater quality related tasks/projects, neither myself nor my group would be responding with comments on this Study unless specifically tasked to do so by upper management which is not likely. If you have any additional inquiries, I would contact my Utilities Dept Director, William Wong, at 209-577-5213. Otherwise, the appropriate staff/consultants will contact you as they determine necessary.

Regards,

Jim Alves

Subject: RE: Modesto Superfund Site

Hi Jim – The Final Feasibility Study for Modesto has been finalized and can be found [here](#). At this point, we are continuing with the Superfund process and working on a Proposed Plan. Once EPA has finalized the document (essentially a fact sheet), we will distribute to the Proposed Plan that described our final remedy for the Site. During this time, EPA will host a public meeting to discuss the Proposed Plan and will be accepting comments. The comment period is typically 30 days of the date of issuance of the Proposed Plan. If you have any questions, please feel free to reach out. It may be a bit faster than reading through the whole document.

Thanks,

USEPA | Superfund

Tu,

This was forwarded to staff in the Modesto Utilities Engineering Division. I would be interested in more about this study. If there is a link that might be helpful, I would appreciate it. When the Feasibility Study is ready and if released, please include me in the distribution list.

Subject: Modesto Superfund Site

Hi Melissa – We are about to finalize our Feasibility Study and will work on the Proposed Plan for the final remedy of the Modesto Groundwater Superfund Site. I just wanted to give you a heads up and see if there's anyone else at the City of Modesto I should contact to give more information. Once the Proposed Plan is finalized, we will send out to the community and hold a public meeting during the public comment period. I am hoping to finalize the Proposed Plan by early next year.

Thanks,

USEPA | Superfund
